Abstract

Graduate in Computer Engineering from the Polytechnic University of Catalonia (UPC - FIB) in the specialty of Software Engineering. I speak native Catalan and Spanish and I have the B2 english level, currently studying for C1.

I adapt quickly to the work environment and always try to bring my point of view within the development team.

In my free time I like to play sports, especially basketball. I have a driving license (B) and my own vehicle.

Computer Skills

- Experience in web development: vue.js (+2y experience), react (1y experience), html5 and css.
- Strong knowledge with programming languages: C, C++, JavaScript, TypeScript and Golang.
- Experience with programming languages: Java and .Net.
- Basic knowledge of Docker, Angular and Python.
- Used to working with *Agile* methodology and Git.
- Used to working with AWS (EC2, RDS, S3, Cloudwatch)

Work experience

- **2014 - Present   Private Classes**
  Privates classes for ESO and Technologic High School students.

- **2012 - 2015   Basketball Coach**
  Assistant Coach Cadet A Sagrat Cor Diputació for three seasons. I was in charge of taking the physical training and the warm-ups of the matches.

- **Feb 2019 - Jun 2020   Full stack developer in SOGETI**
  Full stack dev in Sogeti Labs, working on the SogetiHub project. My duties there were to develop both frontend and backend of the web application working with the agile methodology.
  Working with vue.js, html5 y scss in the frontend.
  Working with .Net language and relational and non relational databases in the backend.
  Moreover, I developed my Final Degree Project here.
  During my stay in this company I learned how a development team works and the good practices that must be followed for a project to progress correctly.

- **Sep 2020 - Feb 2021   Software Developer in BIABILITY**
  Mainly backend developer. My duties there were the development and maintenance of APIs used by the company's clients, working with agile methodology.
  I used the aws EC2, S3, RDS, and Cloudwatch tools to manage those APIs in the cloud. All of these were written in node.js

---

Academic Background

2013 - 2015	High School Degree - Col·legi Sagrat Cor Diputació
2015 - 2020	Software Engineering Degree FIB-UPC
2019	Android application development course

Additional skills to contribute

- Entrepreneurship, teamwork, adaptability and eager to learn.
- Basketball player at Club Bàsquet Poblenou, under-25 category.
- I can work in the office or telecommute.
